

Meet DeltaEZ

We make Delta-E, Delta Easy!

An app for mobile phones & tablets
Use the devices you already carry to bring color measurement anywhere you go

Uses ultra portable color measurement instruments
Carry a real Spectro in your pocket from multiple producers

Enhanced by your mobile device
Utilize the camera and GPS to enrich your measurements

1

CREATE + SHARE

Create your own color libraries and share them with anyone you wish by a single tap.

2

SEARCH

Measure against your library or one that has been shared with you to find the best match.

3

CHECK

Perform quality control and record results. Share measurements back to the color owner

Key Benefits

- Do-it-yourself simplicity for creating, adding, and modifying your color libraries
- Libraries and measurements get synchronized to our cloud server and are always up to date
- Easily share your libraries with other DeltaEZ users and view the results of their measurements
- Integrated messaging allows you to communicate requests without leaving the app

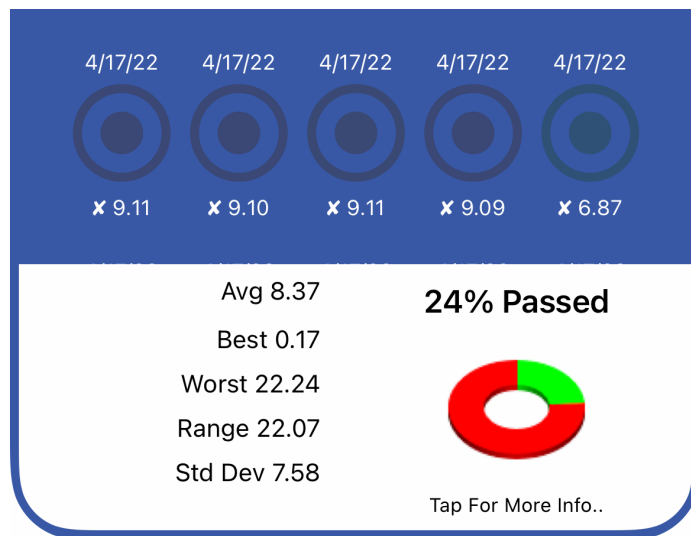

App Features

- ▶ **Newsfeed** - Home Screen list of recent measurements and libraries shared to you
- ▶ **Color Libraries** - Organization of color targets that you create and collections that have been shared with you.
- ▶ **Sharing** - Send single colors or complete libraries to both internal and external users for measurement and evaluation
- ▶ **Messaging** - Integrated communication with text and photos allows you to easily discuss color issues and work together on solutions.
- ▶ **Lighting Simulation** - See color difference between standard and sample in many lighting conditions and judge delta-e acceptability
- ▶ **3D Visualizations** - Observe differences in lightness, chroma, and hue in 3D space where you can rotate, zoom, and translate through your sample measurements
- ▶ **Save Measurements** - Scroll through recorded historical samples or set filters to find specific measurements for comparison, trending, and statistics
- ▶ **Geolocation** - Find where a standard was created and where all the samples that were measured against it were made.

COLLABORATION x MEASUREMENT

Color quality control only begins at measurement. When a Delta-E is calculated, its most powerful when communicated. Seeing results in realtime builds confidence. Based on the result, action can be taken to improve quality before it is too late.

DeltaEZ has integrated messaging where text, photos, and sample results can be shared without needing to leave the app. Everything together multiplies the benefits of measurement.

“This app has allowed us to replace our bench-top measurement system and bring color inspection outside the lab”
- Quality Assurance Manager

Compatible Devices

- Nix Spectro 2 - 0/45 Spex Spectro
- Variable Spectro 1 - D/0 Spex Spectro
- Variable Spectro 1 Pro - D/0 Spin Spectro
- Nix Mini 2 - 0/45 Colorimeter
- Nix Pro 2 - 0/45 Colorimeter
- Additional devices under development
